

Elements required for the InterLaser 9 Solution

Please take note that the ETA for the software is 4 weeks. In an ongoing effort to deliver a professional product within the expected time frame, we ask that all requirements listed below be submitted as soon as possible in order that we may proceed. However, if items are not submitted on time, the initial time frame of 4 weeks could be prolonged.

Date : _____ Company name : _____

Required items:

- A recent cheque data file, with the file structure, produced from your accounting system.
 - **If the ASCII file supplied is different from the file supplied during the development of the software, Binatek will not be held responsible. This could mean additional expenses, charged at an hourly basis.**
- The file structure for the positive pay module, if it has been purchased.
- All various cheque samples for each bank account. You must supply all the information that must appear on the checks.
 - **Binatek will supply the customer with sample cheques of the graphic layout for written approval. Any modification requested after the approval of the tests will incur additional expenses, charged at an hourly rate.**
- Provide all logos which will be printed by the InterLaser 9 software. The format used must be compatible with the Windows environment and must be of very good resolution. (tif, gif, bmp)
- Provide 25 to 30 examples of blank check stock for testing purposes.
- Provide an envelope to ensure correct positioning of the address.
- Provide Signature form(s).

Once the software is ready to be delivered, an e-mail will be sent from our IT support department with instructions on the installation procedures.
